- 8 SECURITY, PRIVACY AND COMPLIANCE**

CHAPTER 1

WELCOME TO THE PLATFORM

One system for the shop, the till, the member, the practitioner and the back office.

Cannaplug connects everything a dispensary needs: a storefront customers love, an account where members follow their orders and rewards, a till and back office for the team, and a secure portal for practitioners. This guide explains every part, step by step. Find your role below and jump to that chapter.

YOU ARE...	START HERE	WHAT YOU CAN DO
A visitor or member	Chapters 2–4	Browse the shop and Journal, ask the chatbot, verify your ID, order, pay, track orders, earn rewards
A budtender	Chapter 5	Run the till (cash, card, EFT), fulfil online orders, check stock
A manager	Chapter 5	Everything a budtender does, plus payments and EFT approval, ID reviews, stock, products, voids/refunds, audit log
An administrator	Chapters 5–6	Everything above, plus staff roles, practitioners and the clinical document policies
A doctor / practitioner	Chapter 6	Receive member requests, write and sign medical letters and prescriptions

HOW THIS GUIDE IS ORGANISED

Each chapter starts with what the screen is for, then numbered steps, then what to do if something looks wrong. Screenshots show the real application with demonstration data.

THE PLATFORM AT A GLANCE

AREA	HIGHLIGHTS
Storefront	Shop, menu, events, Journal (new article every morning), FAQ, contact form, newsletter, Ask Cannaplug AI assistant
Member portal	ID verification, live order tracking, Pay now, reorder, rewards & tiers, addresses, saved products with back-in-stock alerts
Checkout & payments	EFT, card or Instant EFT (Yoco), PayPal; an order is confirmed only after the payment is <i>verified</i>
Admin dashboard	Overview, POS, orders, payments, products, inventory, customers, ID checks, clinical documents, deliveries, audit log
Doctor portal	Patients, requests, medical letters, prescriptions, templates, signatures, QR verification
Automation	Order, payment, ID, stock and newsletter emails; scheduled jobs; daily Journal article at 06:00

CHAPTER 2

THE STOREFRONT

What every visitor sees — and how to get help.

Figure 1. The home page: shop, menu, events, Journal and contact in one scroll.

SHOP AND MENU

The **Shop** lists every product that is available to order online, with live prices. Use the filters for category, strain type and price. Tap **Add** to put an item in your cart; the cart button at the top right shows how many items you have.

Figure 2. The shop with category filters and live prices.

THE JOURNAL

The Journal publishes stories on South African cannabis culture. A new article is published automatically every morning at **06:00 (SAST)**. Subscribers receive a weekly digest on Thursdays.

Figure 3. The Journal index.

CONTACT, NEWSLETTER AND THE FAQ

The contact form on the home page sends your message to **info@cannaplug012.co.za** and emails you a confirmation. The footer newsletter box asks for your email, records your consent and sends a welcome message with a one-click *unsubscribe* link. The FAQ answers common questions about ordering, delivery and accounts.

Figure 4. Contact details, the store video and the contact form.

ASK CANNAPLUG — THE AI ASSISTANT

The green tab on the right opens a chat with **Ask Cannaplug**. It knows our hours, delivery options, payment methods, refund rules, rewards and the current menu.

Figure 5. The Ask Cannaplug chat panel.

WHAT THE ASSISTANT WILL NOT DO

It never gives medical, dosing or treatment advice, cannot see your orders or account, never asks for ID numbers, card details or passwords, and never confirms that a payment has gone through. For anything personal it points you to your account or the team. To keep the service free for everyone it limits each visitor to a few messages per hour; if you see "busy", try again in a minute.

CHAPTER 3

THE MEMBER PORTAL

Sign up once, verify your ID once, then order whenever you like.

1. CREATE YOUR ACCOUNT AND VERIFY YOUR ID

Figure 6. Sign in or create an account at /account.

- 1 Choose **Create account** and enter your name, email, date of birth and a password. You must be 18 or older.
- 2 Confirm your email using the message we send.
- 3 Open **ID Verification** and upload a clear photo of your ID (South African ID, passport or driver's licence). Passports and licences also need an expiry date.
- 4 Our team reviews it — usually within one business day — and emails you the result.

Figure 7. ID Verification shows where you are: not started, in review, verified, or rejected with the reason.

YOUR ID AND PRIVACY

Your ID image is stored privately, shown only to authorised reviewers (every view is logged), and kept for as long as your account exists. South African IDs never expire; passports and licences are re-checked when they expire — we email you 30 days before.

2. YOUR DASHBOARD

Figure 8. The dashboard: orders, total spent, rewards points, recent orders and recommendations.

3. ORDERS — LIVE

Every order appears here and updates by itself — no need to refresh. The timeline shows **Awaiting payment** → **Confirmed** → **Packing** → **Ready** → **Out for delivery** → **Completed**.

Figure 9. Order history with live status. Unpaid orders show **Pay now** and a points-redemption control.

- 1** Open **Orders**.
- 2** For an unpaid order choose **Pay now** (card / Instant EFT or PayPal) or pay by EFT using your order number as the reference.
- 3** Use **Reorder** to rebuy a past order — prices and stock are re-checked first.

4. REWARDS & LOYALTY

You earn **1 point for every R10** you spend, online or in store. Your lifetime points move you up the tiers (Seed, Sprout, Bloom, Canopy). Redeem points against an unpaid order from the Orders tab.

Figure 10. Points balance, tier progress and history.

5. ADDRESSES, SAVED PRODUCTS, SETTINGS

Figure 11. Save up to 10 delivery addresses and choose a default.

Figure 12. Save products. If one is out of stock, tap **Notify me** and we email you when it returns.

Figure 13. Account settings.

CHAPTER 4

CHECKOUT AND PAYMENT

Three ways to pay — and one rule: an order is paid only when the payment is verified.

Figure 14. Step 4 of checkout: choose how to pay.

METHOD	HOW IT WORKS	WHEN IS THE ORDER CONFIRMED?
EFT / bank transfer	Place the order; we hold your items for 2 hours. Pay by EFT using the order number as the reference .	When a manager verifies the payment in the bank account (amounts of R10,000 or more need a second manager).
Card or Instant EFT (Yoco)	You are taken to Yoco's secure page and return afterwards.	Automatically, when Yoco's signed confirmation reaches us and the amount matches.
PayPal	PayPal charges in US dollars. We convert your rand total at today's market rate plus a small conversion margin, and PayPal shows the exact amount before you pay.	Automatically, when PayPal confirms the capture and the amount matches.

RETURNING TO THE SITE IS NOT PAYMENT

After paying you land on a confirmation page that keeps checking with the payment provider. That page never decides whether you have paid. If the confirmation takes a few minutes, do not pay again — the order will update on its own and we will email you.

IF SOMETHING GOES WRONG

WHAT YOU SEE	WHAT IT MEANS	WHAT TO DO
"Confirming your payment..." for a while	The provider has not confirmed yet	Wait; you will get an email. Do not pay twice.
Order still "Awaiting payment" after you paid	The payment did not match (amount/reference) or is delayed	Contact info@cannaplug012.co.za with your order number; a manager checks the Payments screen
"PayPal is temporarily unavailable"	The exchange rate could not be fetched	Pay by card or EFT instead
Your hold expired	Unpaid orders keep stock for a short time	Place the order again; if you already paid we refund or reinstate

CHAPTER 5

THE ADMIN DASHBOARD

Everything the team needs, in one place. Open it at /admin.

The sidebar shows the sections your role may use. Budtenders see the till and fulfilment; managers see money, stock and people; administrators also manage roles and practitioners.

SECTION	BUDTENDER	MANAGER	ADMIN
Overview, Orders, Deliveries, Customers (view)	✓	✓	✓
POS — open/close till, sell (cash, card, EFT)	✓	✓	✓
POS — review till variance, void or refund a sale	—	✓	✓
Stock — receive, adjust, batches	—	✓	✓
Products — create, edit, price, deactivate	—	✓	✓
Payments — EFT confirm, approve, FX rate	—	✓	✓
ID Checks — review and decide	—	✓	✓
Audit log	—	✓	✓

Figure 17. Order detail: delivery and contact details, items, totals and the next allowed steps.

- 1 Open **Orders** and click the order.
- 2 For an unpaid EFT order use **Confirm EFT received** (managers) — see Payments below. The plain *Confirmed* button is deliberately not offered for unpaid orders.
- 3 Use the next-step buttons: **Packing** → **Ready** → **Out for delivery** → **Completed**. Each change emails the member and is recorded in the audit log.
- 4 **Cancelled** releases the held stock.

Figure 18. Deliveries: confirmed, packing, ready and out-for-delivery orders.

POS — THE TILL

The till records in-store sales with cash, card or manual EFT — alone or split across several tenders. Card and EFT need a reference (4–100 characters) that can only be used once.

The screenshot displays the Cannaplug POS interface. On the left is a sidebar menu with options: Overview, POS (highlighted), Orders, Payments, Audit log, Products, Inventory, Customers, ID Checks, Clinical Docs, Deliveries, Promotions, Events, Newsroom, Reports, and Settings. The main area is titled 'POINT OF SALE' with a subtitle: 'Prices, totals and stock are always calculated by the server; this screen only sends products and quantities.' Below this, there are two main sections: 'OPEN TILL' and 'STOCK CONTROL'.

OPEN TILL
 Count the float in the drawer, then open a session to start selling.
 No free drawers. Add one below.

Drawer: Select drawer... (dropdown menu)
 Opening float (R): 0 (input field)
 OPEN TILL (button)

ADD A DRAWER
 e.g. Front counter (input field) ADD (button)

STOCK CONTROL (with 'Receive stock' and 'Adjust stock' buttons)

Product: Select product... (dropdown menu)
 Batch code: e.g. BG-0929 (input field)
 Quantity received: (input field)
 Expiry date (optional): mm/dd/yyyy (input field with calendar icon)
 Unit cost R (optional): (input field)

Receiving into an existing batch code tops that batch up. Earliest-expiry stock is sold first.

Figure 19. The POS screen.

- 1 Choose a drawer and **Open session** with the opening float.
- 2 Add products; optionally pick the customer so loyalty points are earned.
- 3 Choose tenders and amounts; for card/EFT enter the reference. Cash shows the change to hand back.
- 4 **Complete sale.** At the end of the shift **Close session** and count the cash; a manager reviews any variance.

PAYMENTS (MANAGERS)

CANNAPLUG

PAYMENTS

PROVIDERS
Card / Instant EFT (Yoco): **configured**
PayPal: **configured**
Refused webhooks (24h): 0

PAYPAL EXCHANGE RATE (ZAR PER US\$1)
R17.0000 · valid until 2026/10/02, 17:19 · live-spec fixture

Mode: Live market rate | Margin %: 4 | Manual rate: e.g. 17.20

SAVE MARGIN | **SET FOR 24H**

The member is charged slightly more US\$ than the market rate suggests (the margin) to cover PayPal's conversion spread.

NEEDS ATTENTION

- CP-2610-1066 · eft · R200 · **review** · amount_mismatch
- CP-2610-1059 · paypal · US\$12.95 · **review** · amount_mismatch · received US\$0.50
- CP-2610-1057 · yoco · R220 · **review** · amount_mismatch · received R1
- CP-2610-1048 · eft · R200 · **review** · amount_mismatch

RECENT PAYMENT ATTEMPTS

When	Order	Method	Mode	Expected	Status
2026/10/02, 16:21	CP-2610-1066	eft	live	R320	succeeded
2026/10/02, 16:21	CP-2610-1066	eft	live	R200	review
2026/10/02, 16:20	CP-2610-1059	paypal	test	US\$12.95	review
2026/10/02, 16:20	CP-2610-1058	paypal	test	US\$12.95	succeeded
2026/10/02, 16:20	CP-2610-1057	yoco	test	R220	review

Figure 20. Payments: provider status, PayPal exchange rate, items needing attention and every attempt.

- **Needs attention** lists payments that did not match what was expected (wrong amount, currency or reference) or that arrived for a cancelled or already-paid order. Nothing was applied automatically. Check the provider's dashboard, then confirm the order through the EFT workflow if the money is genuine, or refund in the provider's dashboard.
- **EFT approvals:** an EFT of R10,000 or more is recorded by one manager and approved by a *different* manager before the order is confirmed. You cannot approve your own entry.
- **PayPal exchange rate:** live by default (two sources must agree), with a 4% margin to cover PayPal's conversion spread. You can change the margin or set a manual rate for 24 hours.

PRODUCTS AND INVENTORY

The screenshot shows the 'PRODUCTS' management page in the CannaPlug system. On the left is a sidebar with navigation links: Overview, POS, Orders, Payments, Audit log, Products (highlighted), Inventory, Customers, ID Checks, Clinical Docs, Deliveries, Promotions, Events, Newsroom, Reports, and Settings. The main content area has a search bar at the top. Below it, the 'PRODUCTS' section includes a sub-header 'Manager/admin operations. Prices retain historical versions.' and a table of products. Each product row includes its name, category, price, status (Active), and edit/deactivate buttons. An 'ADD PRODUCT' button is in the top right.

Name	Category	Price	Status		
Live Blue Gelato	Flower	R100	Active	Edit	Deactivate
Live Sour OG	Flower	R150	Active	Edit	Deactivate
Live Sold-Out Edible	Edibles	R60	Active	Edit	Deactivate
Blue Gelato	Flower	R50	Active	Edit	Deactivate
Sour OG	Flower	R50	Active	Edit	Deactivate
Purple Fritter	Flower	R50	Active	Edit	Deactivate
Orange Cookies	Flower	R50	Active	Edit	Deactivate
Velvet Moon	Flower	R70	Active	Edit	Deactivate
White Widow	Flower	R70	Active	Edit	Deactivate
Mandarin Cookies	Flower	R70	Active	Edit	Deactivate
Triple Cheese	Flower	R100	Active	Edit	Deactivate
Kings Juice	Flower	R100	Active	Edit	Deactivate
Gorilla Zkittlez	Flower	R100	Active	Edit	Deactivate

Figure 21. Products: create and edit items, set prices, deactivate.

The screenshot shows the 'INVENTORY' management page. The sidebar is identical to the previous screen, but 'Inventory' is highlighted. The main content area has a search bar and a sub-header explaining the inventory calculation: 'Available = on hand minus stock held for unpaid online orders. Figures come from the immutable stock ledger and reservations; change stock in POS → Stock control.' Below this, two inventory cards are shown. Each card displays the product name, a progress bar representing stock levels, and a text summary of the stock counts.

Product	Available	Held	On Hand	Batches
Live Blue Gelato	151	11	162	1
Live Sour OG	194	4	198	1

Figure 22. Inventory: available = on hand minus stock held for unpaid online orders. Receive and adjust stock from the POS stock-control screen.

CUSTOMERS AND ID CHECKS

Figure 23. Customers.

The screenshot shows the Cannaplug web application interface. On the left is a sidebar menu with options: Overview, POS, Orders, Payments, Audit log, Products, Inventory, Customers, ID Checks (highlighted), Clinical Docs, Deliveries, Promotions, Events, Newsroom, Reports, and Settings. The main content area is titled 'ID CHECKS' and features a search bar at the top. Below the title are two tabs: 'WAITING FOR REVIEW' (active) and 'RECENTLY DECIDED'. A table lists four pending ID checks. Each row includes member details, document type, declared date of birth, submission time, status (pending), and a 'REVIEW' button.

Member	Document	Declared DOB	Submitted	Status	
Nina Newbie mur5z4ea thandi.mokoena@example.com	South African ID (card or book) Does not expire	1992-04-20 (34)	02 Oct 2026, 16:15	pending	REVIEW
Nina Newbie mur62do4 thandi.mokoena@example.com	South African ID (card or book) Does not expire	1992-04-20 (34)	02 Oct 2026, 16:17	pending	REVIEW
Rex Rejected mur63wqe thandi.mokoena@example.com	South African ID (card or book) Does not expire	1988-01-02 (38)	02 Oct 2026, 16:19	pending	REVIEW
Pat Passport mur63wqe thandi.mokoena@example.com	Passport Expires 2032-10-02	1985-06-01 (41)	02 Oct 2026, 16:19	pending	REVIEW

Figure 24. ID Checks: the review queue.

- 1 Open **ID Checks** (managers only).
- 2 Choose a member and **View document** — this is logged before the image is shown.
- 3 Tick the confirmation, then **Approve**, or **Reject** with a reason the member will see.
- 4 The member is emailed and their open page updates live.

CLINICAL DOCUMENTS

Figure 25. Clinical Docs (administrators): practitioners, patients, requests, signature policy and the audit trail.

Figure 26. Every staff and till action, with who did it. Entries cannot be edited or deleted.

BEHIND THE SCENES

Emails and SMS are queued and sent by a scheduled job every 5 minutes; stock holds, loyalty retries, ID reminders and the weekly digest run hourly; a new Journal article is published daily at 06:00 SAST. Administrators can see the schedule in the runbook.

CHAPTER 6

THE DOCTOR PORTAL

Requests in, signed documents out — with every step recorded.

Practitioners sign in with their own account at **/doctor**. An administrator verifies their registration number and links patients to them; only then can they issue documents.

Figure 27. The practitioner overview: new requests, items awaiting review, drafts, issued documents and patients.

DAILY WORKFLOW

Figure 28. Patients linked to you.

- 1 Open **Requests**: members can ask for a medical letter or prescription from their account.
- 2 **Accept** a request or **decline** it with a reason.
- 3 Choose **New medical letter** or **New prescription** from a template approved for your practice.
- 4 Fill the clinical fields yourself — nothing clinical is ever pre-filled or suggested by the system.
- 5 Submit for review, review the final text, then **Sign**.

Figure 29. Documents: drafts, awaiting review, issued, expired, revoked.

Figure 30. Templates: versioned wording that you approve before it can be used.

VERIFICATION AND SAFEGUARDS

- Every issued document carries a **QR code and verification link** (*/verify*). The public page confirms whether the document is valid — it never reveals clinical content.
- Documents can be **voided** or **revoked** with a reason; expired documents are marked automatically.
- Signatures follow the signature policy set by an administrator; a signature image can never be reused.
- The assistant chatbot and the content tools have no access to any clinical data.

CHAPTER 7

EMAILS AND OTHER TOUCHPOINTS

Every automatic message, who gets it and what triggers it.

Messages are sent from **Cannaplug Support** <updates@cannaplug.co.za>. They are queued first and retried automatically, so a temporary outage never loses a message.

MESSAGE	RECIPIENT	TRIGGERED BY
Welcome	New member	Account created
ID received / approved / rejected	Member	ID submitted, reviewed
ID expiring	Member	30 days before a passport or licence expires
Order received, payment confirmed, ready, out for delivery, completed, cancelled	Member	Each order status change
Back in stock	Member	A saved product becomes available
Contact form acknowledgement	Sender	Contact form submitted
Newsletter welcome; weekly Journal digest	Subscribers	Subscribing; every Thursday (consenting subscribers only, one-click unsubscribe)
New order; ID waiting for review; payment needs review; refund needed; EFT awaiting approval; low stock	Managers	The matching event
Website message	info@cannaplug012.co.za	Contact form (reply goes straight to the sender)

OTHER TOUCHPOINTS

- **Verification page** (/verify/...): public check of a clinical document's validity.
- **Unsubscribe page** (/unsubscribe): one click from any marketing email.
- **Payment return page** (/payment/return): shows live payment status; never decides it.
- **Sign-in, password reset and confirmation emails** are branded and sent through the same sender.

CHAPTER 8

SECURITY, PRIVACY AND COMPLIANCE

How the platform protects money, stock, people and records.

PROTECTION	WHAT IT MEANS FOR YOU
Payments verified before they count	Provider messages are signature-checked and compared with the expected amount, currency, merchant and order before anything is marked paid. Replays and duplicates change nothing.
Role-based access	Every action is checked on the server against your role; the database refuses anything your role may not do.
Dual control for large EFTs	Amounts of R10,000 or more need two different managers.
Tamper-evident audit log	Till sales, order changes, role changes, ID decisions and payment steps are recorded with who did them and can never be edited.
Private ID storage	ID images are never public, every view is logged, and they are removed if an account is deleted.
Browser hardening	Strict content-security rules, HTTPS-only transport, no framing of clinical pages.
Chat and automation limits	The assistant and the Journal share a usage budget that stays inside the free tier; counters live in the database.

COMPLIANCE WORDING NEEDS SIGN-OFF

Statements about authorisations, registrations, lab testing, banking details and policies appear on the site and in this product. Before launch each one must be approved by the client and backed by a document (see the compliance register in the repository). Until then the release check blocks.

TROUBLESHOOTING

PROBLEM	TRY THIS
I cannot see a section in the admin sidebar	Your role does not include it; ask an administrator.
A member says they never got an email	Check <i>notification_events</i> for the address; see the runbook for dead-lettered messages.
The PayPal button is missing	The exchange rate is unavailable or PayPal is not configured; Payments shows the status.
The chatbot says it is busy	The shared usage budget is used up for now; it recovers each minute / day.
No new Journal article today	The daily job may be paused (rejected API key) or a duplicate was skipped; see the runbook.

NEED A HAND?

Email info@cannaplug012.co.za · Pretoria Central · Mon–Fri 09:00–19:00, Sat 09:00–20:00, Sun 09:00–15:00.

For technical operations — deployments, schedules, secrets, rollbacks — see the Release Runbook in the repository ([docs/release](#)).

Screenshots use demonstration data. Wording on this site and in this guide that relates to authorisations, registrations, testing and legal terms is subject to client approval and documentary evidence before launch.
